

REQUEST FOR QUALIFICATIONS

The San Diego River Conservancy ("Conservancy") anticipates a need for environmental, engineering, architectural, landscape architecture and land planning, biology, archaeology, and construction project management consulting services for Conservancy projects and programs (described below) over the next twelve months. The Conservancy seeks Statements of Qualifications from individuals and firms providing these services. A Statement of Qualifications is a profile of your firm describing: key personnel and relevant education and experience; projects your firm has done, especially those relevant to planning and implementation of a river park, including geographic location; areas of specialization; and relevant professional licenses, certifications and awards. All information received will be put into data base form, and kept on file for one year. (A new Statement of Qualifications must be provided each year). Conservancy project staff will use this information in soliciting services, as needed, for upcoming projects. Any resulting contract will be awarded without discrimination based on race, color, ethnic group identification, religion, age, sex, sexual orientation, disability, or national origin.

The Conservancy undertakes projects in the following areas: (1) public access (e.g., trails, bridges, trailheads, whole access, parking, recreational and interpretive facilities); (2) resources enhancement (e.g., restoration and enhancement of wetlands and endangered species habitats); (3) land acquisition; (4) watershed restoration in order to improve water quality; (5) habitat and water quality monitoring, restoration, and protection. Additional information about the Conservancy can be found on the Conservancy's website at www.sdrc.ca.gov.

We are soliciting consultants in the areas as follows: land surveying and mapping, landscape architecture and planning including GIS mapping; construction project management, civil and hydrological engineering; water quality assessment; geotechnical and geomorphic assessment, pre-project feasibility analyses; economic analyses; hazardous or toxic substance investigation (Phase 1 and II); wetland, watershed, or sub tidal assessments; archaeological studies; environmental documentation and assessment

under the California Environmental Quality Act and the National Environmental Policy Act and other environmental laws and regulation; botanical studies; agricultural studies; soil analyses; biological investigation; site planning; design review; environmental monitoring; and other program related environmental services, such as appraisals for resource conservation purposes.

For further information and to submit a Statement of Qualifications please write to Flenell Owens, San Diego River Conservancy, 1350 Front St. Suite 3024, San Diego, CA 92101.
